Company Work – Deterior
By Shomit Sirohi

So in fact, I realized after years, that I covered a lot of creative work, but did not work itself out on the company.

I mean just compare companies for a living. I would be a normal film footage person. And perhaps add a website I just said about Harvard and Princeton business school.

I now mean I have done more – so cover business reviews from there.

Just keep following – company, offices and showrooms. (How do I review it? Keep covering stories, like if it went that Harvard way, of

a footage, website and if I add that aspect, if I did this, is it a company actually, is it capital, what is a normal website, what is a normal idea, and what is capital or company level stuff, how do you know this is a pick up and drop service taxi app by me, and how do you know other companies – we are talking but not being profound – be cool, and cover tennis, Lincoln means it is like following tennis a company, it is just legal, and rare, not so easy, is that then worth so much, am I that important or creative?)

I just have to know I did a company – people argue there should be a law thing or something, it is covered as American Idealism, I mean – something like Lincoln philosophy

which means just live well, I am valuing it.
